Until the 19th century, linear algebra was introduced through systems of linear equations and matrices.In modern mathematics, the presentation through vector spaces is generally preferred, since it is more synthetic, more general (not limited to the finite-dimensional case), and conceptually simpler, although more abstract.. A vector space over a field F (often the field of the real numbers ...

Calculus is confined to elementary probability theory and probability distributions (Chapters 2—7). Matrix algebra is used modestly in coverage of linear regression material (Chapters 11—12). Linear algebra and the use of matrices are applied in Chapters 11—15, where treatment of linear regression and analysis of variance is covered.
