Paul Hewitt¹ explains it very nicely: Consider Ohm's Law: $V = IR$. What is the resistance of your skin? That depends on the state of your skin: dry or wet. If it's wet, is it water or sweat? Sweat, of course, contains salt; salt water is a good conductor. The resistance will be dramatically different for different situations! Very dry skin has a resistance of about 500,000 Ω , while skin ...

Including undergraduate research in STEM education is a well-supported and growing high-impact practice that has been made much more scalable through integrating these experiences into the classroom. Here we describe a new biochemistry Course-based Undergraduate Research Experience (CURE) that follows a design-to-data workflow with a strong connection to a worldwide community of protein ...
