Semi-Fowler's position. The Semi-Fowler's position is a position in which a patient, typically in a hospital or nursing home is positioned on their back with the head and trunk raised to between 15 and 45 degrees, although 30 degrees is the most frequently used bed angle. The elevation is less than that of the fowler's position, and may include the foot of the bed being raised at the knee to ...

Housing Services. PHFA believes that services for residents play a critical role in the success of affordable rental housing. No matter how that success is defined, whether in terms of resident quality of life and self-sufficiency or in the financial health of the development, services can make the difference between success and failure.
